

MVA Vulnerability Agent

Executive remediation summary generated from Tenable.sc and Tenable.io CSV exports.

8	3	4	1	4
TOTAL OPEN	CRITICAL	HIGH	MEDIUM	IMMEDIATE PATCH

Executive Decision

MVA recommends immediate remediation for four P1 findings in the July 2026 summary window. The highest-risk items combine Critical or High severity with exploit availability, repeated observation, and high asset exposure.

Priority Matrix

Exploit Availability	Critical	High	Medium	Low
Yes / Available	P1	P1	P2	P2
No / Unavailable	P2	P2	P3	P4

Top Remediation Queue

IP Address	DNS Name	Vulnerability Name	CVE	Severity	Exploit	Priority	Exposure	Last Observed
10.20.1.234	web-prod-01	Apache Tomcat AJP Connector Request Injection	CVE-2020-1938	Critical	Yes	P1	920	2026-07-03
10.20.1.235	vpn-gw-02	SSL Certificate Cannot Be Trusted	N/A	High	No	P2	780	2026-07-03
10.20.2.118	sql-prod-03	Microsoft SQL Server Unsupported Version Detection	N/A	Critical	Yes	P1	860	2026-07-03
10.30.5.44	jira-app-01	Remote Code Execution in Web Application Component	CVE-2024-21683	High	Yes	P1	835	2026-07-03

Source Field Mapping

The PDF narrative is driven by normalized MVA fields. Tenable.sc and Tenable.io can use different raw headers, but the output remains consistent.

MVA Field	Tenable.sc Source	Tenable.io Source
IP Address	IP Address	asset.display_ipv4_address / asset.ipv4_addresses
DNS Name	DNS Name / NetBIOS Name	asset.display_fqdn / asset.host_name
Vulnerability Name	Plugin Name	definition.name
CVE	CVE	definition.cve
Severity	Severity / Risk Factor	definition.severity / severity
Exploit Availability	Exploit?	Exploit Ease / definition.exploitability_ease
Remediation	Steps to Remediate	definition.solution / definition.workaround
KB Links	See Also / Cross References	definition.see_also / definition.references
First / Last Observed	First Discovered / Last Observed	first_observed / last_seen

KB Evidence Handling

Finding	KB / Evidence Links	How MVA Uses It
Apache Tomcat AJP Connector Request Injection	https://nvd.nist.gov/vuln/detail/CVE-2020-1938 https://tomcat.apache.org/security-9.html	Referenced in remediation narrative, appendix, and analyst validation checklist.
SSL Certificate Cannot Be Trusted	https://docs.tenable.com/nessus/Content/SSLPlugins.htm	Referenced in remediation narrative, appendix, and analyst validation checklist.
Microsoft SQL Server Unsupported Version Detection	https://learn.microsoft.com/lifecycle/products/	Referenced in remediation narrative, appendix, and analyst validation checklist.
Remote Code Execution in Web Application Component	https://nvd.nist.gov/ https://www.cisa.gov/known-exploited-vulnerabilities-catalog	Referenced in remediation narrative, appendix, and analyst validation checklist.
